1. There are often a number of ways to solve a problem. For example, Europeans settling in the "New World" met Native Americans. Both the Europeans and the Native Americans had different ways of living. Which of the following would have been the FAIREST way for these two groups to live in the same region?

- A. The Europeans should live the way the Native Americans do.
  - B. Both the Native Americans and the Europeans should leave North and South America.
  - C. The Native Americans should live the way the Europeans do.
  - D. Both the Native Americans and the Europeans should have areas where each can live.
- 

2. Sometimes, alternative solutions are presented to solve a problem. For example, the people at the Constitutional Convention in 1787 represented states that had large populations and states that had small populations. They discussed how the states should be represented in the Congress. Which of the following was accepted as the BEST way to solve the problem?

- A. Congress will have two houses, one with representation based on population, and the other with the same number of representatives from each state.
  - B. Congress will have one house, with the states with small populations having more representatives.
  - C. Congress will have one house, with the states with large populations having more representatives.
  - D. Congress will have two houses, one with representation based on population, and the other with representation based on the number of cities in the state.
- 

3. Look at the following information about Georgian products and resources:

-  Cotton is grown in all regions of Georgia.
-  Most of the peanuts are grown in the southwestern part of Georgia.
-  Cattle, hogs, and chickens are raised in all regions of Georgia.
-  Most of the kaolin is mined in southern Georgia.

Based on the information provided, which of the following is true?

- A. Kaolin and pecans are only found in northern Georgia.
  - B. Cotton and peanuts are only found in northeastern Georgia.
  - C. Kaolin and cotton are found in southern Georgia.
  - D. Chickens and wheat are found in southeastern Georgia.
-

4.

Use the maps below to answer this question.

Based on the information provided on the maps, which statement is correct?

- A. The continents of Europe and Asia are connected to each other.
  - B. The prime meridian runs through North and South America.
  - C. The Indian Ocean borders North and South America.
  - D. The equator runs through Africa and North America.
- 

5.

Use the graph below to answer this question.

This graph deals with the production of oil. Based on the information in the graph, which statement is correct ?

- A. The amount of oil produced in 1990 will probably go up.
  - B. The use of oil has stayed the same since 1950.
  - C. The amount of oil produced in 1990 will probably go down.
  - D. The use of oil has gone up and then down since 1950.
-

6. People at the Constitutional Convention were worried that the national government would have too much power. They decided to split the powers between the executive, legislative, and judicial branches. What else was included in the Constitution to solve this problem?

- A. Each branch would have the power to check (control) the other two branches.
  - B. The state governments and the national government would have to agree with each other.
  - C. The President of the United States would be able to check (control) the other two branches of government.
  - D. The only way a decision could be made would be if at least two of the branches agreed with each other.
- 

7. After the Revolutionary War, many Americans wanted to settle in the lands west of the Appalachian Mountains. The mountains were difficult to cross. According to history, what was the solution to help settlers move into Kentucky and other places in the area?

- A. Ships were used to take people to New Orleans and to Kentucky.
  - B. Trains were built to take people to Canada and to Kentucky.
  - C. Trails were built to go through the Appalachian Mountains into Kentucky.
  - D. Canals were built to go around the Appalachian Mountains into Kentucky.
- 

8.

*Use the circle graph below to answer this question.*

**Percentage of U.S. Population  
by Region – 1990**

Based on the information in the graph, which statement is correct?

- A. There are more people in the Northeast and the West than in the Midwest and the South.
  - B. There are more people in the South and the Midwest than in the Northeast and the West.
  - C. There are more people in the West and the Midwest than in the South and the Northeast.
  - D. There are more people in the Midwest and the Northeast than in the West and the South.
- 

9. The equator is an imaginary line

- A. that extends from pole to pole.
  - B. that connects North America and South America.
  - C. that is parallel to the prime meridian.
  - D. that divides the world into hemispheres.
-

10. In the 1800s, one problem with growing cotton in the South was separating the seed from the cotton. Which invention solved this problem?

- A. the invention of the cotton thrasher by Samuel Slater.
- B. the invention of the cotton harvester by Henry Blair.
- C. the invention of the cotton gin by Eli Whitney.
- D. the invention of the cotton reaper by Cyrus McCormick.

**Answer Key**

1. D) Both the Native Americans and the Europeans should have areas where each can live.
2. A) Congress will have two houses, one with representation based on population, and the other with the same number of representatives from each state.
3. C) Kaolin and cotton are found in southern Georgia.
4. A) The continents of Europe and Asia are connected to each other.
5. A) The amount of oil produced in 1990 will probably go up.
6. A) Each branch would have the power to check (control) the other two branches.
7. C) Trails were built to go through the Appalachian Mountains into Kentucky.
8. B) There are more people in the South and the Midwest than in the Northeast and the West.
9. D) that divides the world into hemispheres.
10. C) the invention of the cotton gin by Eli Whitney.
