

Name: _____

Date: _____

1. Which is NOT a characteristic of organisms in the animal kingdom?

- A. They use sunlight to produce their own food.
 - B. They are made up of many different cells.
 - C. They have the ability to move.
 - D. They have cell membranes.
-

2. Racedogs would MOST LIKELY be crossbred for which characteristic?

- A. long hair
 - B. highly developed sense of smell
 - C. companionship
 - D. speed
-

3. New bacteria comes from

- A. unclean water.
 - B. mosquitoes.
 - C. other bacteria.
 - D. flies.
-

4. Several scientists observe an animal with hair and wings. This animal is a

- A. bat.
 - B. bird.
 - C. butterfly.
 - D. flying squirrel.
-

5. Which are NOT found in both birds and insects?

- A. eggs
 - B. feathers
 - C. legs
 - D. wings
-

6. The frog, toad, and salamander are grouped together because they share all of the following characteristics EXCEPT

- A. being cold-blooded.
 - B. having scales.
 - C. laying eggs.
 - D. reproducing in water.
-

7. How are dandelion seeds different from apple seeds?

- A. Dandelion seeds produce new plants.
 - B. Dandelion seeds are not formed from the flowers.
 - C. Dandelion seeds need rain, soil, and sunlight to germinate.
 - D. Dandelion seeds are light and can be carried by the wind.
-

8. Which statement BEST tells why snakes lie in the sun?

- A. Snakes are afraid of cold, dark places.
 - B. Snakes can only find food in the dark.
 - C. Snakes use the Sun's light rays to make food.
 - D. Snakes need heat from the Sun to stay warm.
-

9. A paramecium is a one-celled animal. Which of the following MUST be true about the paramecium?

- A. Its one cell does everything it needs to live.
 - B. It can only live inside the cells of other living things.
 - C. It is the smallest living thing.
 - D. It causes dangerous diseases.
-

10. Which pair of kingdoms has members that can make their own food?

- A. Plants and Animals
- B. Fungi and Protists
- C. Protists and Plants
- D. Monerans and Fungi

Answer Key

1. A) They use sunlight to produce their own food.
2. D) speed
3. C) other bacteria.
4. A) bat.
5. B) feathers
6. B) having scales.
7. D) Dandelion seeds are light and can be carried by the wind.
8. D) Snakes need heat from the Sun to stay warm.
9. A) Its one cell does everything it needs to live.
10. C) Protists and Plants
